EARNIE Business

EARNIE Business is a flexible system ideal for growing businesses with up to 100 employees

It is fully HMRC accredited so you can be confident it will handle legislative requirements - no matter how quickly they change.

You can even tailor the payroll to the way you work - set up your own payments and deductions, absence categories and user-defined fields to capture and report on the information important to you.

EARNIE Business also offers a costing module, enabling employee costs to be divided between multiple cost centres.

As your business grows, EARNIE can grow with you. You can easily upgrade to our larger EARNIE Executive system without losing any of your important payroll data.

Share your data to save even more time

EARNIE Business integrates links with a range of BACS, time and attendance, accounts and HR systems (including IRIS HR Manager). Entering your data only once and sharing it between your various systems saves considerable time.

Back up services

The team behind EARNIE has over 20 years payroll experience and a dedicated support team is on hand 5 days a week so you can be confident expert support is always available.

You can choose from a large range of stationery to complement EARNIE and additional bureau services such as payslip printing and BACS processing are also available.

CIS calculations

EARNIE can easily handle your construction industry payments with an optional CIS (construction industry scheme) module.

It performs all the necessary calculations using specific CIS rules and connects directly to HMRC Gateway. It even verifies the tax status of each contractor so your life is made easier. Your sub-contractors payroll is kept completely separate to PAYE employees to ensure no mix-ups when reporting to HMRC.

Spreadsheet Import

Quickly import data directly into your payroll run with the optional Spreadsheet Import facility. Set up templates containing the exact information you require then either link to an Microsoft Excel spreadsheet or manually key in the data.

Ideal for accountants, bureaus or any companies with lots of variable pay information.

Key features
